

JOSE PABLO SAMANO SUAREZ

Computer Science Student | Software Engineering | Cybersecurity | Full-Stack Product Systems

Wolfville, NS / Mexico City | jpss2004@icloud.com | 6195978559 | linkedin.com/in/jose-pablo-samano-suarez | github.com/jpss2004-bot

EDUCATION

Acadia University

Bachelor of Science in Computer Science

- Coursework and project focus: software engineering, data structures, databases, cybersecurity, systems analysis, human-machine interaction, cloud/security fundamentals, and secure application design.

Trinity College School

High School Diploma

Wolfville, NS

Expected May 2027

Port Hope, ON

June 2023

WORK EXPERIENCE

Cybolt

Cybolt Academy Participant

- Completed hands-on workshops on MITRE ATT&CK, ICS/OT security, cyber kill chain, incident response, and defensive blue-team operations.
- Analyzed adversary TTPs and ransomware behavior to connect attack patterns with detection, containment, investigation, and decision-making.
- Built STAR-based incident-response interview cases, translating technical scenarios into clear, evidence-oriented narratives.

Mexico City

May-Sep 2025

Michelin

Production Operator

- Operated and monitored rubber-processing equipment in a high-pressure industrial environment while maintaining quality, safety, and consistency standards.
- Identified and communicated production delays or equipment issues to reduce workflow interruptions and support plant continuity.

Waterville, NS

May-Sep 2024

Legal Shelf

Data Processor

- Digitized, archived, and organized legal documents with structured metadata, improving retrieval, traceability, and file administration.
- Handled sensitive information under strict confidentiality and data-protection practices during legal document processing.

Mexico City

May-Aug 2023

PROJECTS

Family Phrase Game

Developer

2026

Flask | HTML | CSS | JavaScript | Render

- Built and deployed a Flask web app that turns family-submitted phrases into a playable party game with phrase loading, scoring, and a simple live interface.

ER Triage & Queue Manager

System Designer

2025

Python | NiceGUI | SQLite

- Modeled an emergency-room workflow around intake, vitals, priority scoring, patient state, status history, and dashboard visibility.

LEADERSHIP EXPERIENCE

SAVR - Context-Aware Dining Recommendation Platform

Founder / Developer

Wolfville, NS

2025-Present

FastAPI | React | TypeScript | SQL

- Building a full-stack platform that ranks restaurants using preferences, budget, social context, and user intent.
- Designed Describe Your Night, Build Your Night, and Surprise Me flows that turn structured inputs into prioritized, explainable recommendations.
- Implemented backend and frontend improvements across authentication, restaurant data, recommendation APIs, onboarding, presets, and result components.

TECHNICAL SKILLS

Software: Python, Java, JavaScript/TypeScript, C, C#, SQL, React, Next.js, FastAPI, Flask, REST APIs, Git

Data & Delivery: PostgreSQL, SQLite, SQLAlchemy, data modeling, validation, testing, Vercel, Render, documentation

Cybersecurity: Incident response, threat analysis, MITRE ATT&CK, cyber kill chain, SOC fundamentals, ICS/OT security, authentication, access control

Languages: Spanish native, English C2, French A2

ADDITIONAL TRAINING

- CompTIA Security+ coursework, CompTIA CySA+ coursework, COMP 601 Cybersecurity Fundamentals, and MITRE ATT&CK & Incident Response Workshop.
- Ongoing practice in defensive security, incident-response interviews, technical documentation, adversary-behavior analysis, and SOC fundamentals.
