

JOSE PABLO SAMANO SUAREZ

Computer Science Student | Software Engineering | Cybersecurity | Full-Stack Product Systems
Wolfville, NS / Mexico City | jpss2004@icloud.com | 6195978559 | linkedin.com/in/jose-pablo-samano-suarez | github.com/jpss2004-bot

PROFILE

Computer Science student at Acadia University who ships production software for a paying client. Built and maintains two systems in daily use at LegalShelf: CheckWise, a REPSE compliance platform serving 3 client companies and 15+ vendors with close to 20,000 documents processed, and Verifaid, a document verification system. Works across full-stack engineering, domain modeling, and cybersecurity. Open to software engineering internships and junior technical roles.

EDUCATION

Bachelor of Science, Computer Science, Acadia University | Wolfville, NS | Expected May 2027

- Focus: software engineering, data structures, databases, cybersecurity, systems analysis, human-machine interaction, and secure application design.

High School Diploma, Trinity College School | Port Hope, ON | June 2023

EXPERIENCE

Software Developer, LegalShelf | Mexico City / Remote | 2026-Present

- Builds and maintains two systems in production and daily use: CheckWise, a REPSE compliance platform, and Verifaid, a document verification system.
- CheckWise serves 3 client companies and 15+ vendors, with close to 20,000 compliance documents processed to date. Built the FastAPI backend and Next.js 15 / React 19 frontend covering evidence intake, reviewer adjudication, and portfolio-wide risk views with JWT auth and role-based access.
- Modeled REPSE obligations as institution x cycle (SAT, IMSS, INFONAVIT, STPS; monthly through annual) so the operating calendar and expediente gates derive from the data model, and shipped an AI-assisted reports centre guarded by an AI-safety suite inside 320+ backend tests.
- Built database cleanup and metadata-extraction pipelines that make large document sets consistent, queryable, and reliable to process downstream.

Cybolt Academy Participant, Cybolt | Mexico City | May-Sep 2025

- Completed hands-on workshops on MITRE ATT&CK, ICS/OT security, cyber kill chain, incident response, and defensive blue-team operations.
- Analyzed adversary TTPs and ransomware behavior to connect attack patterns with detection, containment, and investigation, and built STAR-based incident-response interview cases.

Production Operator, Michelin | Waterville, NS | May-Sep 2024

- Operated and monitored rubber-processing equipment in a high-pressure industrial environment, flagging delays and equipment issues to protect plant continuity.

Data Processor, Legal Shelf | Mexico City | May-Aug 2023

- Digitized and organized legal documents with structured metadata under strict confidentiality and data-protection practices.

SELECTED PROJECTS

Founder / Developer, SAVR - Context-Aware Dining Recommendation Platform | Wolfville, NS | 2025-Present

- Deployed full-stack recommendation platform (FastAPI, React, TypeScript, SQL) that ranks venues using preferences, budget, social context, and user intent, and states why each result fits.
- Designed Describe Your Night, Build Your Night, and Surprise Me flows connecting structured inputs to prioritized, explainable recommendation cards. Live at context-aware-dining-platform-1.vercel.app.

System Designer, ER Triage & Queue Manager | 2025

- Modeled an emergency-room queue workflow around intake, vitals, ESI v4 acuity scoring, patient state, status history, and dashboard visibility using Python, NiceGUI, and SQLite, showing the clinical reasoning behind every assigned level.

Developer, Family Phrase Game | 2026

- Built and deployed a Flask web app that turns family-submitted phrases into a playable party game with phrase loading, scoring, and a simple live interface.

TECHNICAL SKILLS

Software	Python, Java, JavaScript/TypeScript, C, C#, SQL, React, Next.js, FastAPI, Flask, REST APIs, JWT auth, Git
Data & Delivery	PostgreSQL, SQLite, SQLAlchemy, Alembic, data modeling, metadata extraction, validation, testing, Vercel, Render
Cybersecurity	Incident response, threat analysis, MITRE ATT&CK, cyber kill chain, SOC fundamentals, ICS/OT security, authentication, access control
Languages	Spanish native, English C2, French A2
Training	CompTIA Security+ and CySA+ coursework, COMP 601 Cybersecurity Fundamentals, MITRE ATT&CK & Incident Response Workshop
